Abstract: Have you ever wondered what it takes to get one of those "Elusive" bug bounties that people are always snapping up? In this presentation, Gillis Jones will walk you through the fundamentals of the web, and on to the art of hacking the planet. Complete with examples, secrets that the professionals try and keep quiet, and suggestions on "How to Hack" - this presentation aims to bring you to a level of proficiency in hacking the web in less than 60 minutes.

Bio: A giant of a man, Gillis Jones is currently employed as a Security Consultant at Accuvant Labs. He has been engaged in web application security for the last four years, and has worked with companies to increase their security posture all the way from a Stealth Startup to a multi-million dollar business with hundreds of employees. He is the founder of the Badmin Project, and has worked with dozens of entry level security people to assist them in becoming "1337".
9:00 – 10:00  Keynote Hall: G. Mark Hardy
Presentation: "How the West was Pwned"
