FAIL

SecTor 2017
We all have jobs we’d like to keep.

Anything you might hear us say is ENTIRELY in your own head - just like the other voices.

Our personalities have been breached. This is not us anymore.
Introducing the panelists....

-2 minutes
Ben Sapiro

Formerly an experienced principal consultant and manager with 11 years of information security experience.

Now leading enterprise security programs helping executives achieve meaningful security outcomes relative to the risks the business faces.
Ben Sapiro

During my 11 years of security consulting I focused on hard security engineering problems (process, architecture and implementation) and security evangelism (R&D, education and strategy).

Ben Sapiro

He is the only “real professional” on the panel.

Don’t hold it against him.

At least he didn’t wear a suit this time. Usually he does. It makes him look super smart.
Dave Lewis

Dave has almost two decades of industry experience. He has extensive experience in IT operations and management. He is the founder of the security site Liquidmatrix Security Digest and co-host of the Liquidmatrix podcast. Dave writes a column for CSO Online and Forbes.
Dave Lewis

Prior to his current role, Dave worked in the finance, healthcare, entertainment, manufacturing and critical infrastructure verticals. He has worked for a defense contractor as a security consultant to clients such as the FBI, US Navy, Social Security Administration, US Postal Service and the US Department of Defense to name a few.
Dave Lewis

Everyone knows Dave.

Because he’s the one who is the evangelist.

Join in his evangelism.

He’ll anoint you with a brick of enlightenment.

While serenading you with his bass guitar complete with unicorn shoulder strap.
Rich Mogull

Rich has twenty years experience in information security, physical security, and risk management. He specializes in data security, application security, emerging security technologies, and security management. Prior to founding Securosis, Rich was a Research Vice President at Gartner on the security team where he also served as research co-chair for the Gartner Security Summit. Prior to his seven years at Gartner, Rich worked as an independent consultant, web application developer, software development manager at the University of Colorado, and systems and network administrator. Rich is the Security Editor of TidBITS, a monthly columnist for Dark Reading, and a frequent contributor to publications ranging from Information Security Magazine to Macworld. He is a frequent industry speaker at events including the RSA Security Conference and DefCon, and has spoken on every continent except Antarctica (where he’s happy to speak for free – assuming travel is covered).

Prior to his technology career, Rich also worked as a security director for major events such as football games and concerts. He was a bouncer at the age of 19, weighing about 135 lbs (wet). Rich has worked or volunteered as a paramedic, firefighter, and ski patroller at a major resort (on a snowboard); and spent over a decade with Rocky Mountain Rescue. He currently serves as a responder on a federal disaster medicine and terrorism response team, where he mostly drives a truck and lifts heavy objects. He has a black belt, but does not play golf.
Also,

THE CLOUD
Rich Mogull

Rich is also one of the original members of the DEF CON Comedy Jam - nicknamed The Fail Panel.

He brings real street cred to the proceedings today.
James Arlen

Recovering consultant who now has a straight forward operations job - trying to do the security thing for just one company and getting back some work life balance.

In addition to day-job at a major PaaS company, James also works on Cloud Security things with Rich at Securosis and is a part-time Professor of Comp Sci at Mohawk College (on strike).

Best described as: “Infosec geek, hacker, social activist, author, speaker, and parent.” His areas of interest include organizational change, social engineering, blinky lights and shiny things.
